

40 Basic Coding Interview Questions for 5–6 LPA Roles

1. Reverse a string without using built-in functions.
2. Check if a string is a palindrome.
3. Find the largest element in an array.
4. Find the second largest element in an array.
5. Remove duplicates from an array.
6. Count the frequency of each character in a string.
7. Find the missing number in an array of 1 to N.
8. Check if two strings are anagrams.
9. Find the factorial of a number.
10. Generate the Fibonacci series up to N terms.
11. Check whether a number is prime.
12. Find the GCD/HCF of two numbers.
13. Reverse an integer.
14. Count the number of vowels in a string.
15. Find the sum of all elements in an array.
16. Move all zeros to the end of an array.
17. Find the maximum consecutive repeating character in a string.
18. Merge two sorted arrays.
19. Find the intersection of two arrays.
20. Rotate an array by K positions.
21. Find the first non-repeating character in a string.
22. Count the occurrence of a given element in an array.
23. Check whether a number is an Armstrong number.
24. Find the largest word in a sentence.
25. Sort an array without using built-in sort.
26. Implement Binary Search.
27. Implement Linear Search.
28. Find the duplicate element in an array.
29. Check if a string contains only digits.
30. Find the length of the longest word in a sentence.
31. Convert a string to title case.
32. Find the common elements between two arrays.
33. Check whether brackets are balanced.
34. Find the maximum sum subarray (Kadane's Algorithm).

35. Reverse the order of words in a sentence.
36. Count the number of digits in an integer.
37. Find the minimum element in an array.
38. Check whether two arrays are equal.
39. Find all pairs in an array whose sum equals a target value.
40. Implement a simple stack using an array.
